

Template: AI Tools for WordPress Publishing Checklist

Generated: 4/1/2026

Based on Article: "Best AI tools that publish to WordPress"

Website: <https://scaleblogger.com>

A practical checklist for efficiently using AI tools to publish content directly to WordPress while maintaining control and quality.

Checklist Items:

- 1. Ensure API Publishing Capability**
Check if the AI tool can publish or update posts through the WordPress REST API, ensuring compatibility with your WordPress setup.
Reference Section: [How we evaluated AI publishing tools](#)
- 2. Maintain Editorial Control**
Verify that the tool provides features for draft mode and a review step, allowing editors to manage content before it goes live.
Reference Section: [How we evaluated AI publishing tools](#)
- 3. Map SEO Fields Accurately**
Ensure the tool can correctly handle and map important SEO fields like title, slug, excerpt, categories, and tags during the publishing process.
Reference Section: [How we evaluated AI publishing tools](#)
- 4. Implement Scheduling Features**
Test the tool's ability to queue posts for scheduled publishing, ensuring consistency across different time zones and teams.
Reference Section: [How we evaluated AI publishing tools](#)
- 5. Plan for Analytics Support**
Establish pathways for comparing published content performance against traffic or engagement metrics to measure success.
Reference Section: [How we evaluated AI publishing tools](#)
- 6. Conduct Integration Testing**
Run tests with different permission levels to identify any issues with publishing and ensure smooth content transfer without errors.
Reference Section: [How the tests ran](#)
- 7. Monitor for Field Accuracy**
Regularly check for gaps in field mapping that may cause issues, such as lost tags or improperly formatted content.
