

# Template: Remote Work Security Checklist

Generated: 4/27/2026

Based on Article: "Exploring Remote Work Security Tools: What You Need to Know"  
Website: <https://remotesuccesshub.com/>

A practical checklist to enhance security for remote work environments.

## Checklist Items:

- 1. Secure your Wi-Fi network**  
Ensure your home Wi-Fi has a strong password and uses WPA3 encryption to protect against unauthorized access.  
Reference Section: [Why remote work security changes the rules](#)
- 2. Use unique passwords**  
Utilize a password manager to create and store strong, unique passwords for each service to prevent credential theft.  
Reference Section: [Essential security tools for remote teams](#)
- 3. Enable Multi-Factor Authentication (MFA)**  
Set up MFA on all accounts that support it, providing an additional layer of security beyond just passwords.  
Reference Section: [Essential security tools for remote teams](#)
- 4. Conduct regular software updates**  
Ensure all software, including operating systems and applications, are regularly updated to patch vulnerabilities.  
Reference Section: [The main threats remote professionals need to understand](#)
- 5. Use a VPN when on public Wi-Fi**  
Always connect to a Virtual Private Network (VPN) when using public Wi-Fi to protect your data from interception.  
Reference Section: [Main threats](#)
- 6. Secure personal devices**  
If using personal devices for work, implement endpoint management and ensure devices are encrypted.  
Reference Section: [Essential security tools for remote teams](#)
- 7. Monitor for phishing attempts**  
Be vigilant against phishing emails that request sensitive information or contain fake login prompts. Verify the sender before clicking links.  
Reference Section: [The main threats remote professionals need to understand](#)
- 8. Implement device encryption**  
Encrypt all work devices to protect sensitive data in the event of loss or theft.  
Reference Section: [Essential security tools for remote teams](#)
- 9. Separate work and personal accounts**  
Use distinct accounts for work and personal use to prevent accidental data sharing and compliance issues.
